

Change store locations or configure scanner using App Provisioning

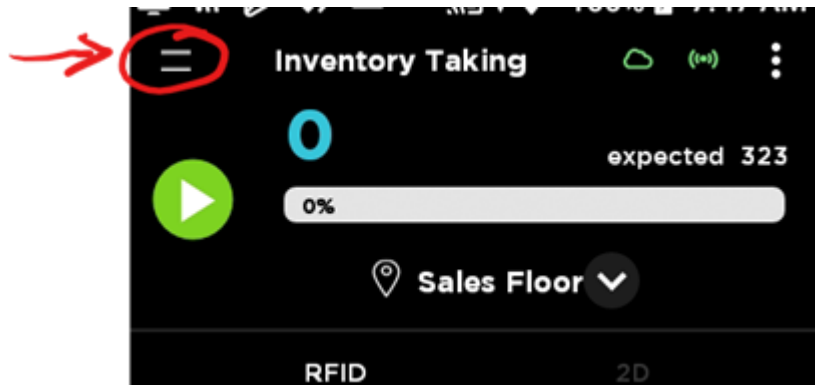

- 1) Open your RIOT portal and select Settings > App Provisioning from the side menu.

- 2) Select your site ID and select submit

- 3) A data matrix barcode will display – note this is specific to the store you selected in the site ID
- 4) Open your scanner App and select the hamburger icon from the top left corner.

- 5) Scroll down to settings and then scroll down and select Quick start.

Quick Start Settings

Enable Quick Start?

Check the box to enable Quick Start Feature

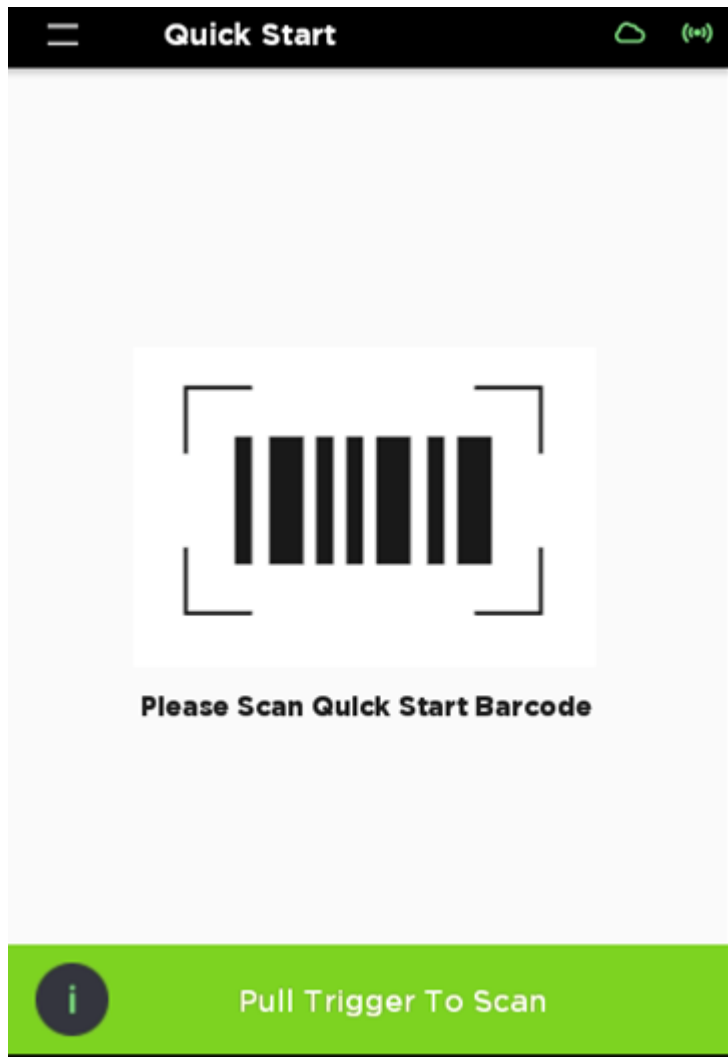

Go to Quick Start Menu?

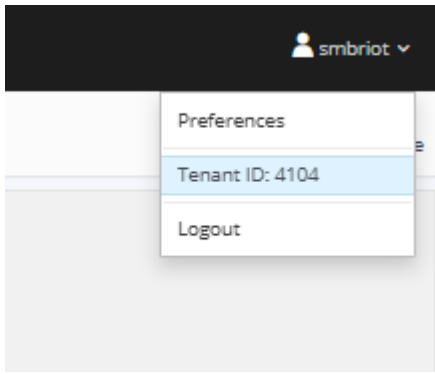

Click button to go to Quick Start

QUICK START

- 6) Click on the Quick Start button and scan the datamatrix barcode from the RIOT portal.

- 7) When prompted, enter your Tenant ID. This can be found by clicking on your username on the top right of your screen.

8) Close out the scanner app and relaunch

NB***

If you need to change your store/site ID, you can do you by simply changing the store number in the scanner settings, close out the app and relaunch.

1. Open the RIOT app

2. Click on the hamburger icon in the top left

3. Scroll down to settings

4. In the cloud credentials box, edit the UserID to match the required store

Cloud Credentials

2@jason.co.za
User ID

Password

5. UserID: Storenumber@domain

6. Edit the number by clicking on the existing entry, then click ok
